The English Year (being bissextile) begins from the 6th of Nov. 1695, till the 23. of Decr. 1696 then becomes Occidental of the Sun, and continues our Morning Star to the Years end.

There will be 2. Eclipses of the Sun this Year; Two of the Moon, but sensible to us, and many of the Stars which will be visible in our Horizon if the Air be clear. The first will be on the 6th of May, near midnight. The second will be the 30th of October, near 4. in the Morning, and both totally darkned with continuance, worth Observation. And on the 14th of December there will be a famous conjunction of Saturn and Mars, in the 26th deg. of Capricorn, not then visible, being at the time of the New Moon.

This was called the Fatal Battel of Naseby, &c of which take this brief Account: His Majesty himself commanded the main Body, the Right Wing was commanded by Prince Rupert and Maurice, the Left by Sir Marmaduke Langdale. Sir Thomas Fairfax commanded the Main Body of the Rebels, Cromwell the Right Wing, and Ireton the Left. Prince Rupert falls upon their Left Wing, routs them, and pursues them thro' Naseby Town. In the mean time Fairfax falls on the King's Main Body, and Ironsides Cromwell charging furiously on the Left Wing of the King's Army, brake the King's Army all in Pieces. Yea there were great Rallying on both sides and many sharp Contexts, till at length the Victory turned wholly to the Parliament. The King's Horse retreating disorderly towards Leicester, were pursued by Cromwell, and a great many of them taken. The Foot-Souldiers desiring Quar-

This was the last set Battel that ever the King fought, and might well be called the *Fatal Battel of Naseby*.

1646 His Royal Majesty most graciously the second time offered to come to the Two Houses, and advlse with them for the good and safety of the Kingdom; as also upon some Conditions to pass an Act of Oblivion and Free Pardon: which was refused by the Parliament, who had great advantage of the King at this time. A Description of the four Quarters of the Year, and first of Winter.

Sol in Capricorn, Aquarius, Pifces.

According to the custom of Writers in this Kind, Winter-quarter is the first quarter, which took beginning the 11 day of December, at which time the Sun enter'd into the first degree of the cold and dry Sign Capricorn, being the most remote from us, in his farthest South Declination, causing the days with us to be shortest, and the nights longest. This quarter continues until the Sun hath slowly passed through Capricorn, Aquarius, and Pifces; and doth naturally resemble Old Age.

Of the Spring. Sol in Aries, Taurus, Gemini.

This quarter doth take beginning the 21 of March, at which time the Sun entrench into the first minute of Aries, making equal day and night; and continues whilst the Sun is passing through Aries, Taurus and Gemini. This quarter doth resemble Growing Youth.

Of Summer. Sol in Cancer, Leo, Virgo.

The Summer-quarter doth take his beginning when the Sun enters into the first degree of Cancer, which will be this year on the 11 of June; and continues whilst the Sun passeth through Cancer, Leo, Virgo. Now the days are longest, and the air hottest; therefore but for necessity, bid Physick adieu.

Of Autumn. Sol in Libra, Scorpio, Sagittarius.

Autumn, or Harvest-quarter (commonly called the Fall of the Leaf, of some the latter Spring) begins when the Sun enters into the first degree of Libra, again making the day and night of equal length; which will be this year the 12 of September, and continues whilst the Sun passeth through Libra, Scorpio, and Sagittarius. This quarter doth fitly resemble Declining Age, and Phlegmatick Complexion.
